

"Serving the Community Since 1955"

Northside Engine Company 2011 Fund Drive

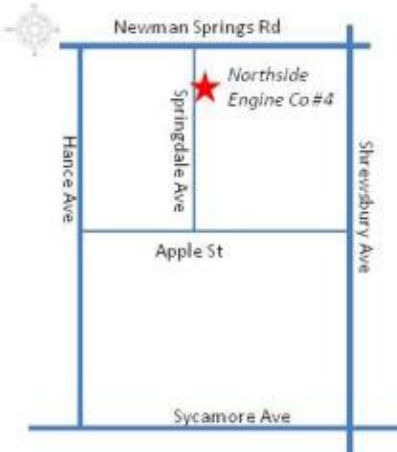

Northside Engine Company (NSEC) is a group of volunteers from the community that has been part of the borough of Tinton Falls' fire protection since 1955. We respond to 300+ calls every year no matter the day or time.

Our members have on average 15 years experience, attend monthly drills and annual training to maintain the skills necessary to operate the equipment and protect the borough in the event of an emergency. We are all proud to be here and to serve our neighbors when they call.

As part of Fire District #2, we are provided with the best equipment to serve the community, however we maintain our firehouse which is company owned since it was built in 1955. We strive to keep costs low, but there is a lot of wear and tear when there are four pieces of apparatus in use weighing between 8,000 and 60,000 lbs and sometimes repairs and upgrades are necessary. Some of our recent maintenance items include a completely new roof, replacement of the cracked concrete apron, resurface and lining of the parking lot, updated fencing to fit in with the neighborhood, repainting of the bay areas including repair and resurface of floor cracks.

Once again, we are turning to our neighbors for financial assistance to help us keep the building in good repair and safe for both the members and community. You have always been generous and we thank you for your past support. We look forward to many more years of continued service to the Tinton Falls community.

Please support our efforts by responding to this fund drive with a donation.
